Remarks

1. In view of the Appeal Brief filed on 02/25/2008, PROSECUTION IS HEREBY REOPENED.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

2. The 35 U.S.C. § 112 second paragraph rejection to claim 10 is withdrawn in further review the claim and specification.
3. Claims 1-23 remain pending and have been examined.
4. Claims 1-17 and 20-23 are allowed.

Response to Arguments

5. Applicant's arguments, see pages 6-19, filed 02/25/2008 with respect to the rejection(s) of claims 1-8, 11-17 and 20-23 have been fully considered and are persuasive. The Examiner accepts the Applicants' explanation about the definition of "construct" as a small code block/group of pieces of source code, but not an entire program file as known in the field (see for example, p.8, second paragraph and referred specification last paragraph of page 2. "A computer application, including objects, typically has hundreds or thousands of these components, which in turn may be grouped into smaller pieces of source code called program structures or constructs, as is known in the field" and examples of conditional construct, loop construct...). Therefore 35 U.S.C. § 102(e) rejection to claims 1-8 and 10, 35 U.S.C. § 102(b) rejection to claims 11-15 and 20-23 and 35 U.S.C. § 103(a) rejection to claims 9 and 16-19 are withdrawn.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 18 and 19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 18:

Claims 18 claims an integrated development environment (IDE), which is a software development tool, only consists of computer software program and can be interpreted as computer program listings per se. Although, the Applicant amends the claims to incorporate "when executed by a processor" for each of elements, the integrated development environment is still considered as a software program without being embedded in the computer readable storage medium and executing by the processor. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer, which permit the computer program's functionality to be realized. Thus, they are not statutory.

See M.P.E.P. 2106.01 (I)

Claim 19:

Claim 19 depends from claim 18, does not remedy the deficiencies as noted above respectively, and thus is also rejected under 35 U.S.C. 101 for the same reasons.
